

EWG M2 Recommendation to the ICH Steering Committee
Electronic Standards for the Transfer of Regulatory Information (ESTRI)
Physical Media - Recommendation 2.2 29APR1996

Title: Physical Media 2.2 - CD-ROM

Date: 29 April 1996

Background:

It is recognized that information flows could use network or physical media, depending on such things as the volume or the urgency of the information.

Recommendation:

The Expert Working Group recommends that the following standards relating to the use of Physical Media be adopted by the Steering Committee:

- CD-ROMs conforming to the ISO 9660 standard (capacity up to 640 MB) for transferring up to 3 GB (approximately 5 CD-ROMs) information

Conditions:

- This recommendation does not apply to the aspect of storage and long term archiving.
- This recommendation does not cover various aspects of different operating systems. However, platforms including DOS, Unix, Mac OS, Windows, and VMS have been tested and demonstrated by the Expert Working Group to be compatible with ISO 9660 CD-ROMs.

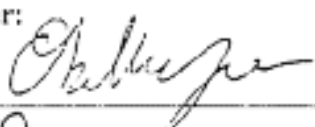

Remarks:

None.
